CHRISTINE MIRZAYAN
SCIENCE & TECHNOLOGY POLICY
GRADUATE FELLOWSHIP PROGRAM

FORMER FELLOWS AT THE NATIONAL ACADEMIES

NOTE: All units may not participate during each session, and there is no way to know in advance which units will be accepting fellows. Review this former fellows list to see which units have accepted fellows recently. Applicants may apply for up to seven units, and we strongly encourage everyone to select the maximum number.

FORMER FELLOWS

Sorted by Program Unit/Academy:

- [Division on Behavioral and Social Science and Education \(DBASSE\)](#)
- [Division on Earth and Life Studies \(DELS\)](#)
- [Division on Engineering and Physical Sciences \(DEPS\)](#)
- [Gulf Research Program](#)
- [Health and Medicine Division \(HMD\)](#)
- [National Academy of Engineering](#)
- [National Academy of Sciences](#)
- [Policy and Global Affairs \(PGA\)](#)
- [Transportation Research Board \(TRB\)](#)

Division of Behavioral and Social Sciences and Education (DBASSE)

About DBASSE:

The Division of Behavioral and Social Sciences and Education – one of five divisions within the National Academies – works to advance the frontiers of the behavioral and social sciences and their applications to public policy.

The goal of our work is to provide independent, evidence-based advice to decision-makers on key questions of national importance, such as:

What is the best way to measure levels of poverty in the United States?

How do parents, teachers, and policymakers know how well students are learning?

How can the public participate most effectively in decision-making about the environment?

Why does life expectancy differ greatly among high-income countries, and how can the answer to that question help increase the life expectancy of Americans in the future?

Division on Earth and Life Studies (DELS)

About DELS:

The Division on Earth & Life Studies is one of six subject area divisions that enlist the nation's top experts to respond to requests for advice from the Federal Government, states, and some foundations. Activities of the Earth and Life Studies division cover a wide range of issues related to agriculture; management of water and other natural resources; earth sciences; life sciences; chemical sciences; atmospheric, ocean, and polar sciences; environmental health and toxicology studies; nuclear and radiation science and technology; and animal research.

Division on Engineering and Physical Sciences (DEPS)

About DEPS:

The mission of the Division on Engineering and Physical Sciences (DEPS) is to provide independent and authoritative science, technology, engineering and related policy advice to the federal government and to the nation and to promote communications between the science and technology community, the federal government, and the interested public.

DEPS seeks to assess the role of science and technology in important public policy issues and to advance science and engineering, identifying needed research as well as improvements in data and research methods. In these ways, it fosters better science and technology and their use to support decisions on public policies and programs.

DEPS' work is organized around four broad areas:

- Unique government missions in defense, space, and aerospace
- National infrastructure challenges such as energy and environmental systems, information and telecommunications, manufacturing and engineering design, civil engineering, and the constructed environment
- Science and engineering disciplines such as physics, astronomy, computer science and engineering, materials science and engineering, and the mathematical sciences and their applications.
- Continuing assessments of federal government laboratories and research programs

Gulf Research Program (GRP)

About [Gulf Research Program](#):

In 2010, the Deepwater Horizon disaster resulted in the largest offshore oil spill in U.S. history. This had serious impacts on the environment and people of the Gulf of Mexico region. As part of the settlements in the criminal cases with the companies involved, the federal government requested that a new program be established at the National Academies of Sciences, Engineering, and Medicine dedicated to funding and conducting activities to enhance offshore energy system safety, human health, and environmental resources in the Gulf of Mexico region and other U.S. outer continental shelf regions that support offshore energy production. Settlement funds totaling \$500 million were designated toward a 30-year endowment for what became the Gulf Research Program.

The Gulf Research Program is an independent, science-based program that funds grants, fellowships, and other activities in the areas of research and development, education and capacity building, and monitoring and synthesis. The GRP's mission is to catalyze advances in science, practice, and capacity to generate long-term benefits for the Gulf of Mexico region and the Nation.

Former Fellows within the Gulf Research Program:

Health and Medicine Division

About HMD:

The Health and Medicine Division (HMD) is a division of the National Academies of Sciences, Engineering, and Medicine (the National Academies). HMD's aim is to help those in government and the private sector make informed health decisions by providing evidence upon which they can rely. Each year, more than 3,000 individuals volunteer their time, knowledge, and expertise to advance the nation's health through the work of HMD.

Many of the studies that HMD undertakes are requested by federal agencies and independent organizations; others begin as specific mandates from Congress. While our expert, consensus committees are vital to our advisory role, HMD also convenes a series of forums, roundtables, and standing committees, as well as other activities, to facilitate discussion; discovery; and critical, cross-disciplinary thinking.

National Academy of Sciences (NAS)

About NAS:

The National Academy of Sciences (NAS) is a private, non-profit society of distinguished scholars. Established by an Act of Congress, signed by President Abraham Lincoln in 1863, the NAS is charged with providing independent, objective advice to the nation on matters related to science and technology. Scientists are elected by their peers to membership in the NAS for outstanding contributions to research. The NAS is committed to furthering science in America, and its members are active contributors to the international scientific community.

National Academy of Engineering (NAE)

About NAE:

Founded in 1964, the National Academy of Engineering (NAE) is a private, independent, nonprofit institution that provides engineering leadership in service to the nation. The mission of the National Academy of Engineering is to advance the well-being of the nation by promoting a vibrant engineering profession and by marshalling the expertise and insights of eminent engineers to provide independent advice to the federal government on matters involving engineering and technology.

Policy and Global Affairs Division (PGA)

About PGA:

The mission of Policy and Global Affairs is to help improve public policy, understanding, and education in matters of science, technology, and health with regard to national strategies and resources, global affairs, workforce and the economy. The division is particularly charged to identify and build synergy among the disciplines and issue areas, and to promote interaction among science, engineering, medicine and public policy. The division includes a range of standing committees and boards concerned with the vitality of the research enterprise in the US and abroad. In that connection, the units of the division focus particularly on the interaction of key institutions central to science and technology policy, on the standing of US research around the world and cooperation with Science & Engineering bodies in other countries, on the mission and organization of federal research activities, and on the sources of future manpower and funding for research.

Transportation Research Board (TRB)

About TRB:

The Transportation Research Board (TRB) provides innovative, research-based solutions to improve transportation. TRB is a program unit of the National Academy of Sciences, Engineering and Medicine, a non-profit organization that provides independent, objective, and interdisciplinary solutions.

TRB manages transportation research by producing publications and online resources. It convenes experts that help to develop solutions to problems and issues facing transportation professionals. TRB also provides advice through its policy studies that tackle complex and often controversial issues of national significance.
